

I hope you will allow K-Love to maintain it's position on the FM dial. We live in a world where things are so unsensored that it is a comfort to have a station like K-Love on the radio. One can listen to this station with anyone especially impressionable children and not have to worry. We need this station and more like them to help in the fight against all the wrong things that are in the everyday lives of society today. Like the call words of the station it is positive and encouraging what could be wrong about a station like that. I challenge you to listen to other stations for a few days then try K-Love for a few days you will notice the difference. The country cannot go wrong with K-Love, we need them.
